DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II (claim 5) in the reply filed on 4/6/06 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, "the raw material" and "the bean product" lack antecedent basis. The reference to a variety of flavor materials prefaced by "such as" is indefinite in that it is not clear whether or not the claim is limited by such alternatives. The optional limitation of the last two lines is indefinite in that it is not clear whether the first water addition of step(a) has been contemplated and whether or not this is a second optional addition of water.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 1761

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by any one of GB 2228173, Abe, and Hiroya (JP 60-192550).

GB 2228173 discloses a process of preparing a bean food wherein water is added to a bean product with a flavoring additive (e.g. spice) wherein same are then mixed and steamed (see Abstract).

Abe discloses a process wherein corn material (which would inherently effect the flavor) and water are both added to a soybean, mixed, and steamed (e.g. claim 12 therein).

Hiroya discloses a process wherein soybean flour and water are combined, seasoning is mixed together (during the kneading step) and steam treated.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
